

## Pultruded Fiberglass Grating

Pultrusion technology is a manufacturing process which produces uniform cross-sectionally shaped glass-fiber reinforced polymer composite profiles. These profiles are designed to compete with the strength properties of traditional metal grating structures, but offer the inherent environmental benefits that come with using fiberglass. The fiberglass reinforced polymer matrix is ideal for corrosive environments and greatly reduces the maintenance required over the life-time of the grating.

### Key Features

- Corrosion Resistant
- High Strength
- Fatigue Resistant
- Lightweight
- Easy to Fabricate & Install
- Fire Retardant
- Maintenance free
- Non-conductive
- Low Thermal Conductivity
- Slip Resistant
- Rust Free & Weather Proof
- Cost Effective
- Uniform in appearance
- UV Resistant

### Applications

Pultruded fiberglass grating is designed and used in a wide variety of applications, such as:

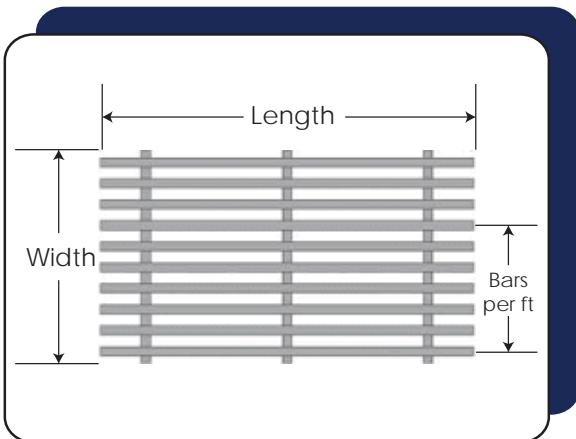

- Chemical Plants
- Marine/Offshore
- Petrochemical Plants
- Shipping Docks
- Pulp & Paper Mills
- Transportation Industry
- Communication Industry
- Water Treatment Plants
- Processing Plants
- Oil Rigs
- Food Processing
- Power Plants
- Mining Industry
- General Industry

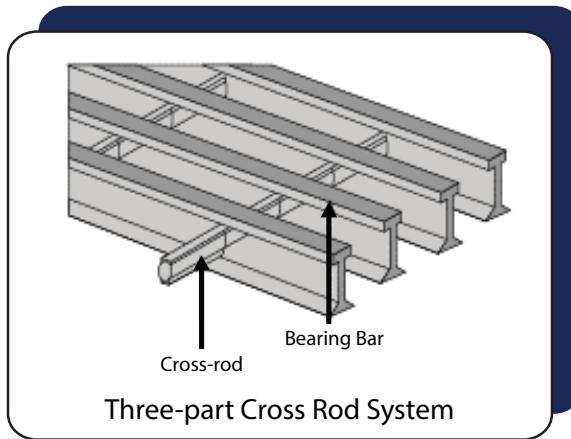

### Product Selection

Part Number	Bar Type	Thickness (in)	Size (ft)	Color	Resin Type	Open Area (%)	Bars per ft	Approx. Wt. (lb.ft <sup>2</sup> )
IG6010-PP-Y-320	I	1.0	3 x 20	Yellow	Premium Polyester	60	8	2.39
IG6010-PP-DGY-320	I	1.0	3 x 20	Gray	Premium Polyester	60	8	2.39
IG6010-PP-Y-420	I	1.0	4 x 20	Yellow	Premium Polyester	60	8	2.39
IG6010-PP-DGY-420	I	1.0	4 x 20	Gray	Premium Polyester	60	8	2.39

## Mechanical Properties of Pultruded Grating

Property	Test Method	I-Series (70-75% Glass)	T-Series (60-65% Glass)
Tensile Strength	ASTM D638	125,000 psi	100,000 psi
Tensile Modulus	ASTM D638	6 x 10 <sup>6</sup> psi	5.6 x 10 <sup>6</sup> psi
Flexural Strength	ASTM D790	125,000 psi	100,000 psi
Flexural Modulus	ASTM D790	6 x 10 <sup>6</sup> psi	5.6 x 10 <sup>6</sup> psi
Compressive Strength	ASTM D695	65,000 psi	60,000 psi
Izod Impact Notch	ASTM D256	40 ft-lb/in	40 ft-lb/in
Barcol Hardness	ASTM D2583	50 (min)	50 (min)
Specific Gravity	ASTM D792	2	2
Water Absorption	ASTM D570	Max 0.3%	Max 0.3%

## Resin Selection

Selecting the correct resin type is critical in providing corrosion resistance and ensuring the life-time dependability and performance of the grating. If you are unsure which resin type fits your application's needs, feel free to contact us.

**Type PP** is a premium isophthalic polyester resin. It is a popular choice for most applications due to its good corrosion resistance properties and relative low cost. This type of resin is most commonly used in applications where there is a possibility of a splash or spill of harsh chemicals.

**Type GP** is an orthophthalic polyester resin commonly used for general purpose applications. It is an ideal choice for light industrial applications and moderate corrosive environments. It offers superior protection from corrosion and rust compared with traditional metal grating. Common applications include: water treatment plants, irrigation applications, walkways and trench covers.

### ■ Load Table Notes

- The designer should not exceed the recommended safe load at any time. The safe load represents a 2:1 factor of safety.
- Walking loads, typically 50 PSF is recommended for pedestrian traffic. Deflections for worker comfort are typically limited to 3/8in or SPAN divided by 120 under full loads. For a more rigid feel under full loads, limit deflection to 1/4in or SPAN divided by 200.
- The allowable loads are for static conditions at ambient temperatures. Allowable loads for impact or dynamic loads should be a maximum of 1/2 the value shown. Long term loads will likely result in added deflection due to creep in the material and will also require higher safety factors to ensure acceptable performance.

N/R - Not Recommended

'-' No Information Available

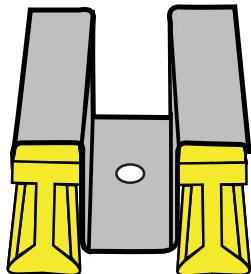

### Notes

The chemical resistance chart is to be used as a general reference guide. Resin manufacturers have provided data which indicates that specific resins can withstand the corrosion conditions listed. Testing for specific environments is recommended if the environment is unknown. North American Grating believes the following data to be true and accurate but does not guarantee expressed or implied performance from the data presented.

## Clips & Accessories

### Saddle Clips

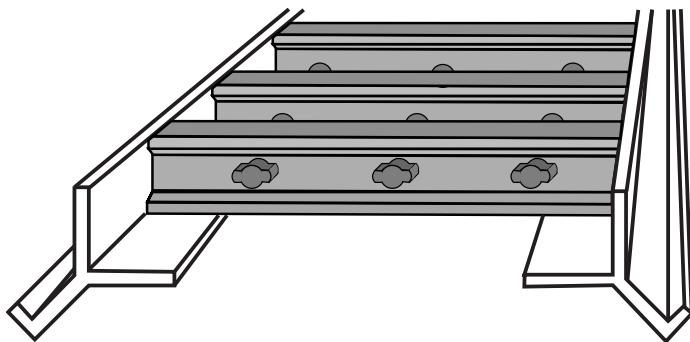

Sizes

1"	SSC10
1-1/2"	SSC15
2"	STC20

Model: SSC & STC

- 316 Stainless Steel
- Typically used for attaching grating to structural supports and joining two panels together
- Available in 3 sizes
- Model SSC is used for I-Bar grating
- Model STC is used for T-Bar grating

### Curb Angle

- Pultruded Fiberglass curb angle
- Provides a strong and sturdy base for pultruded grating
- Typically used in drainage, irrigation and structural applications
- Available in 3 sizes
